Guidelines InnovateX

1. Poster Format and Printing:

- a. Use the given LaTeX template to create your poster.
- b. Ensure the poster size is A1 paper (594 mm × 841 mm or 23.4 in × 33.1 in).
- c. Use high-quality images and graphics for clarity.
- d. Double-check for any spelling or formatting errors before printing.

2. Content Sections:

- a. Introduction: Clearly state the purpose and objectives of your project.
- b. Abstract: Summarize your project concisely, highlighting the key aspects.
- c. Related Works/Background: Discuss the existing literature and research relevant to your project.
- d. Methodology: Describe the approach or methodology used in your project.
- e. Results: Present the findings or outcomes of your project, supported by data, charts, or graphs.
- f. Conclusion: Summarize the main conclusions drawn from your project.
- g. References: Include a list of the sources you have cited in your poster.

3. Poster Layout and Design:

- a. Use a clear and legible font that can be easily read from a distance.
- b. Divide your poster into sections with headings for each topic.
- c. Use bullet points, tables, and diagrams to present information effectively.
- d. Ensure a logical flow of information from one section to another.
- e. Use colors, images, and graphics to enhance visual appeal and make the poster engaging.

4. Evaluation:

- a. The external faculty will evaluate your poster based on its content, organization, visual appeal, and your presentation skills.
- b. Pay attention to the evaluation criteria provided by the evaluator.
- c. Be prepared to answer questions related to your project during the evaluation process.
